MARKET SUMMARY

SEPTEMBER, 1968

GENERAL COMMENT

The Industrial and Western Oil Indices reached all-time highs as the market continued its firming trend. For the second consecutive month all major index groups advanced. The Industrial Index climbed 7.3 points, its best monthly gain since June, in reaching a record of 178.72 September 25. The previous Industrial Index high was set in May, 1965. The Index has advanced 22% since March when a 1968 low of 144.46 was touched. Gains by industrial issues outnumbered declines on 18 of the 20 trading days. A total of 14 of the 15 Industrial Index sub-groups advanced with many sections making substantial gains. Merchandising was the only group to record a loss.

Gold, which reached a record high in March, made a small gain.

Base Metals were up for the fourth consecutive month and closed just below their all-time record, set in August, 1956 of 112.07. In 1965, the index high was 87.49.

Western Oils showed considerable strength, adding 22 points to reach a new index peak.

TRADING ACTIVITY

A surge of trading in industrial issues pushed industrial value and volume to new monthly highs. Total industrial value was \$391.3 million, a gain of 19% over the previous record of \$329.7 million set in July. Industrial volume increased 28% to 29.7 million shares.

Industrial share volume never dipped below 1 million shares per day and average daily turnover throughout the month was 1.49 million shares. Total value of trading at \$511.1 million was up 23% over July's record total.

9 MONTH TRADING COMPARISON

	Total Value	Total Volume	Industrial Value	Industrial Volume	Mines and Oils Value	Mines and Oils Volume
1967	2,573,203,839	629,447,210	1,711,968,895	94,683,019	861,234,944	534,764,191
1968	3,259,551,467	638,442,790	2,387,379,721	162,084,668	872,171,746	476,358,122

EARNINGS

Interim earnings reports released during the month by listed companies showed certain industry groups to have better earnings than in the similar period last year.

DIVIDENDS

There were eight dividend increases in September with the largest being First National City Bank up 20¢ to \$2.20. Dividend payments by Canadian Industrial companies reached a record total during the first 9 months of 1968.

STOCK YIELDS

Generally rising prices resulted in a lower yield for the Industrial Index, 3.40%, compared with 3.53% the previous month. Sub-groups with yields over 4% were: Utility, Trust and Loan, Steel, Paper and Forest.

PRICE / EARNINGS RATIO

Price/earnings ratio for the Industrial Index increased substantially to close at 17.48, up from 16.75 in August. The Communications group was high at 28.69.

JEFFERSON LAKE PETRO-CHEMICALS OF CANADA LTD.

Jefferson Lake Petrochemicals (J.L.P.) established itself in Western Canada in 1957 as a pioneer producer of elemental sulphur recovered from sour natural gas. In 1958, J.L.P. acquired a sulphur inventory and all fixed assets, contract rights and undertakings, in Canada, of Jefferson Lake Sulphur Company. Following the merger of Jefferson Lake Sulphur Company with Occidental Petroleum Corporation in March of 1964, J.L.P. became a subsidiary of Occidental Petroleum Corporation which currently holds 56% of the former's common shares. The remainder of the shares currently outstanding are held by the public.

TEN YEARS OF GROWTH

The performance and growth of J.L.P. during the short period of the past 10 years has been closely

watched by investors and competitors alike.

A summary review of the Company's financial and operating performance during the past 10 years is shown in the table below. Over the 5-year period 1963-1967 alone, gross revenues accruing to the Company increased at a cumulative rate in excess of 26% per year while net income increased at a cumulative rate in excess of 50% per year. Earnings per share for the same 5-year period rose from \$0.46 to \$1.72.

Gross income for year 1968 is expected to surpass the record levels set during the past year. Total revenue for the first 6 months of 1968 as compared to the same period for 1967 increased by 25% to \$5,544,000 and profits rose 5% to \$2,064,000. During the period ended June 30, 1968, earnings similarly increased by 5.4% to \$.78

per share.

J.L.P.'s initial production came from its Peace River Plant, a 300 long ton per day facility producing elemental sulphur from concentrated hydrogen sulphide gas obtained from the nearby Westcoast Transmission gas processing plant at Taylor, British Columbia.

In October of 1959, J.L.P. entered into an agreement with Westcoast Transmission for the production of elemental sulphur from hydrogen sulphide supplied from Westcoast's Savanna Creek Field near Coleman, Alberta. This new plant, with capacity of 377 long tons per day, went into operation in late 1961.

The company's principal asset is its 30.9% interest in a sour natural gas processing plant located in the Calgary field. In order to produce

TEN YEAR FINANCIAL AND OPERATING SUMMARY (as at December 31)

JEFFERSON LAKE Continued

the reserves contained in this field, J.L.P. in conjunction with Mobil Oil Canada, Ltd. and several other companies, organized Petrogas Processing Ltd. J.L.P. acts as operator of this plant which commenced operations in December of 1961. The initial complex, built at a cost of approximately \$13,500,000, was expanded in 1965 to provide for the recovery of propane and butane. Further expansion was undertaken in late 1966 and today the Petrogas plant complex ranks as the second largest sulphur recovery plant of its type in the world with productive capacity in excess of 2,000 long tons per day. Pipeline gas capacity is approximately 210 million cubic feet per day and all such gas is currently being sold under 20-year contract to Westcoast Transmission Company Limited and Trans-Canada Pipelines Limited.

In 1967, gross sulphur production from these three plants totalled approximately 512,000 long tons and represented 23.6% of total Canadian output for 1967 of 2,169,000 long tons. Thus, over the short period of 10 years, J.L.P. has become one of Canada's largest sulphur producers and is, in large part, responsible for Canada's current ranking as the world's second largest sulphur producer. Net sulphur production for the first 6 months of 1968 as compared to the same period for 1967 increased by 40% to 130,602 long tons and net sulphur sales rose over 5% to 96,612 long tons.

In addition to the volumes of natural gas liquids produced at the Petrogas plant, J.L.P. holds a working interest in several crude oil producing properties in Northeastern British Columbia, Alberta and Saskatchewan.

At December 31, 1967, J.L.P.'s share of cumulative production from owned and operated plants and working interest properties amounted to 1,251,000 long tons of elemental sulphur, 64 billion cubic feet of pipeline gas and 1,565,000 barrels of natural gas liquids and crude oil. Despite the withdrawal of these large production volumes from total reserves, continued exploratory and development drilling has resulted in continued reserve additions which have more than offset any depletions resulting from the exploita-

tion of presently proven reserves.

EMPHASIS ON EXPLORATION

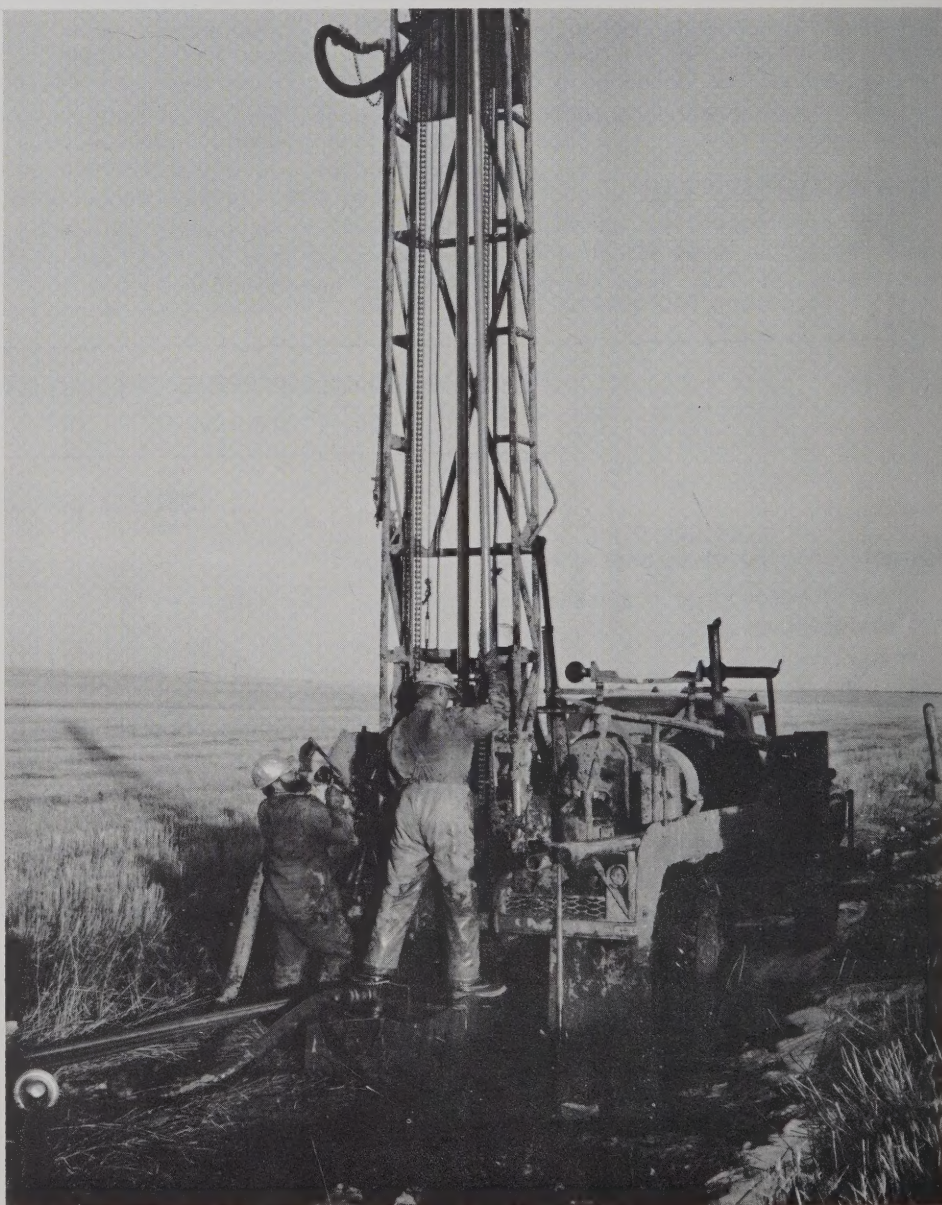

Since its inception in 1958, J.L.P. has followed an aggressive policy of petroleum and natural gas exploration. In 1966, J.L.P. and Occidental Petroleum Corporation formed a joint venture petroleum and natural gas exploration program with an annual budget of approximately \$6,000,000 to be shared equally by each Company.

Over the past 3 years alone, total gross land holdings of the Company have increased by over 530% to a level of 3,915,000 gross acres. Of this total,

J.L.P.'s net holdings at year-end 1967 were 1,188,000 acres spread over the three western provinces as indicated on the adjacent map. In early 1968, the Company jointly acquired, with Occidental Petroleum, an undivided 50% interest in 419,120 acres of additional land holdings in the Northwest Territories. At June 30, 1968, the Company's land holdings throughout Western Canada amounted to 4,415,128 gross acres or 1,312,433 net acres.

Geological and geophysical programs have been actively undertaken on all of the Company land holdings to date. Geophysical prospecting in 1967 resulted in the completion of 2,532

Seismic operation in southern Alberta.

gross lineal miles of reflection seismic and 4,395 gross lineal miles of gravity surveys as compared to 273 gross lineal miles of seismic and 1,048 gross lineal miles of gravity completed during 1966.

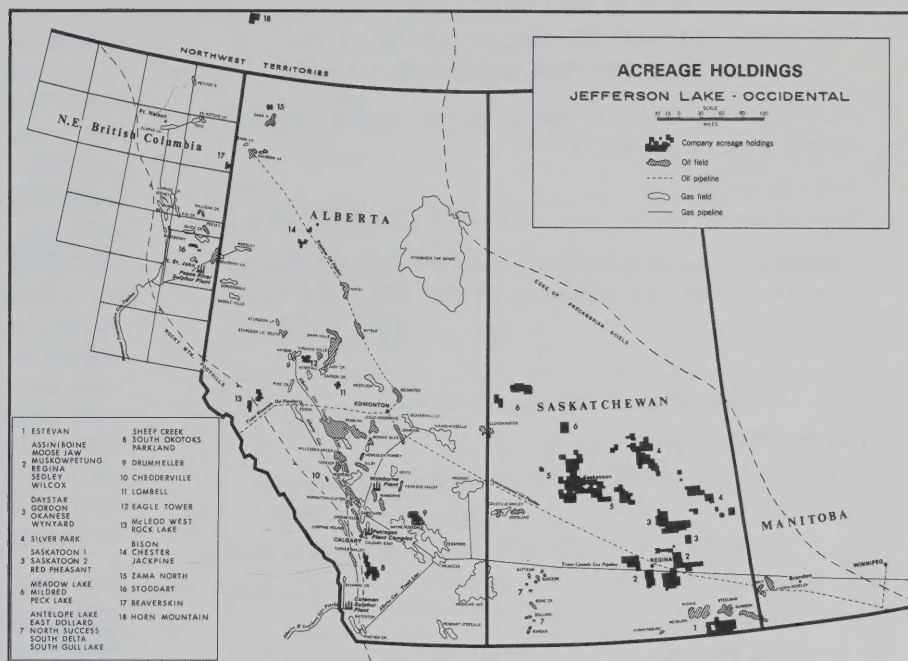

During the 10-year period 1958-1967, J.L.P. has participated in the drilling of 158 gross exploratory and development wells. The Company's net completed wells during this 10-year period totalled 55.9 wells of which 18.5 net wells were completed as sour natural gas producing wells; 11.7 were completed as crude oil producing wells; 0.9 were completed for pressure maintenance operations and 24.8 net wells were non-commercial and subsequently abandoned.

Exploratory drilling during 1967 resulted in two sour gas discoveries in Alberta. In August of the current year, a commercial oil discovery approximately 105 miles southeast of Regina, Saskatchewan, was announced by the Company and its partners, Scurry-Rainbow Oil Limited and Occidental Petroleum Corporation. The well, located on a 1,600 acre tract, has recovered high gravity oil from a Devonian-age producing formation. The discovery is considered by the industry to be a significant development inasmuch as it is the first proven Devonian production in a relatively extensive area of the province. Soon after the discovery, J.L.P., the operator, and its partners, bid successfully on an adjacent 3,680 acre drilling reservation.

During 1968, the Company is expected to participate in the drilling of approximately 41 exploratory and development wells, principally in Saskatchewan and Alberta.

In order to carry out its aggressive exploration and development programs in areas of known or potential petroleum and natural gas reserves, the Company has continually added to its staff of exploration and production personnel such that the complement of these combined functions has tripled during the past 2 years.

The degree of staff experience and financial strength which exists today permits the Company to actively pursue ways and means of broadening its base of operations so as to assure continued growth within the petroleum and petrochemicals industries.

Seismic crew at work in Saskatchewan.

HISTORY

The company is the continuing corporation following an amalgamation in June, 1968, of 10 drug store firms: Don York Drugs Ltd., Don-Koffler Drugs Ltd., G.E.M. Drugs (London) Limited, G.E.M. Drugs (Ottawa) Limited, Griekoff Company Limited, Murlease Company Limited, K.R.H. Drug Company Limited, Parkwoods-Koffler Drugs Limited, Plaza Drug Stores Limited and Super-Deal Discount Stores Limited. At the same time, Kofflers acquired three other businesses: Kochild's, Eglinton Square Drugs Limited and Jack Gwartz Drugs Limited.

The amalgamation brought together the Koffler organization and the Plaza Drugs chain as one corporate unit. Koffler has been in the pharmacy business in Toronto since 1921. It embarked on a programme of expansion in the mid 1950's. As well as drug stores, Plaza has established health and beauty aid units in major suburban and regional shopping centres.

NATURE OF BUSINESS

Under franchise agreements, the company owns and operates a chain of retail drug stores and drug departments located in Ontario. A total of 28 stores are located in Metropolitan Toronto. The business of the company embraces pharmacies and drug departments as well as health and beauty aid stores which market a wide range of prescription drugs, proprietary drugs, cosmetics and toiletries, photographic equipment, tobacco, magazines and sundry products.

The company has two wholly-owned subsidiaries: Plaza Drugs (Toronto) Limited and Sayval Drug Company Ltd. It also has a share interest in 10 companies and two partnerships.

SALES

In 1967, the combined retail sales of the company and its franchises amounted to approximately \$28,000,000.

EARNINGS

During the past five years, average annual earnings were \$382,265.

DIVIDENDS

An initial dividend of \$.10 was declared payable October 31, to shareholders of record on September 30.

SHARES IN ESCROW

A total of 408,000 shares or 51% of the outstanding shares are held in escrow by Canada Permanent Trust Company, Toronto.

JOREX LIMITED, SUITE 904, 85 RICHMOND ST. WEST, TORONTO, ONTARIO.

On September 25 listed 4,000,000 shares without par value.

Stock Symbol JX
Dial Quotation No. 2158

President - - - - - J.J. Rankin
Vice-President - - - - - R.L. Segsworth

NATURE OF BUSINESS

The company was incorporated in February, 1968, for exploration and development of mines and miner-

JOREX LIMITED Continued

als. It has not yet commenced exploration or mining operations and holds no properties or interests in properties.

INITIAL FINANCING

By an agreement dated June 28, 1968, McIntyre Porcupine Mines Limited, Conwest Exploration Company Limited, Brimet Securities Limited and Rayrock Mines Limited, Greenshields Incorporated and John Joseph Rankin agreed to provide initial financing and management for the company. McIntyre, Conwest and Rayrock are Toronto-based public mining companies. Brimet is the wholly-owned subsidiary of The British Metal Corporation (Canada) Ltd. Each company agreed to purchase 100,000 shares at a purchase price of \$1 per share. At any time up to and including June 30, 1971, they will purchase an additional 100,000 shares.

UNDERWRITING

By agreement dated August 28, 1968, Greenshields Inc., investment dealer, purchased from the company 500,000 shares to sell to the public with the proceeds going to Jorex Limited.

Mr. J. J. Rankin, President.

PROPOSED ACTIVITY

Using funds made available through the sale of shares, Jorex intends to prospect and explore for minerals in Canada and the United States with concentration on Canada. It plans an annual budget of approximately \$225,000 over the next 5 years. Exploration work will be carried out on its own behalf but the major expenditure will be for programs initiated by the company and syndicated with up to four partners. If a mineral deposit of apparent commercial value is located, Jorex plans to incorporate a new company to develop the deposit to production.

ASSETS

As at July 15, 1968, current assets for Jorex totalled \$33,747.

DIVIDENDS

The company does not anticipate paying dividends in the foreseeable future.

Above \$65.00	1/6% plus 36.42¢	1/6% plus \$36.42	

GUIDE TO THE CALCULATION OF COMMISSIONS

100 — SHARE RATE

All calculations for stocks selling above \$1.00 will be based on the 100-share rates shown in the tables of the Toronto Stock Exchange Commission Rate Booklet. For example, the Booklet indicates that the commission for 100 shares at \$9.00 is \$23.00. For a sale of 65 shares at \$9.00, the commission would be calculated as follows: $65/100 \times \$23.00$. For a sale of 199 shares at \$9.00 the commission would be calculated as follows: $199/100 \times \$23.00$.

ROUNDING

Rounding will follow the standard practice of leaving unchanged the unit digit in any calculations where the fractions of a cent are below 1/2 cent; when the fractions are 1/2 cent or more the unit digit will be raised by one cent. Thus, \$26.013 would remain as \$26.01; but, \$26.015 or \$26.018 would be raised to \$26.02. Consider the sale of 311 shares at 11 7/8. The commission rate for 100 shares at 11 7/8 is \$27.88; therefore, the commission for 311 shares would be $311/100 \times \$27.88 = \86.7068 . Rounding would result in a commission of \$86.71.

1/6 OF 1%

All calculations in the table in respect to 1/6 of 1% are based on an absolute decimal value of 0.0016667. Thus, to calculate the commission on a 100-share transaction of a \$137 stock (which is not shown in the booklet) the procedure would be as follows: $0.0016667 \times \$13,700$

= \$22.83379. Rounding this figure results in \$22.83 to which must be added \$36.42, (The rate above \$65.00 is 1/6% plus \$36.42) producing a commission of \$59.25.

OTHER COMMISSION DATA

MINIMUM COMMISSION

When the total amount involved in a transaction is less than \$10.00, the charging of any commission shall be at the member's discretion.

When the total amount involved is \$10.00 or more but less than \$50.00, the commission shall be discretionary except that a minimum of \$2.00 shall be charged.

When the total amount is \$50.00 or more, the minimum commission shall be \$5.00 except in connection with a transaction in rights or warrants when the minimum commission shall be \$1.00.

RIGHTS AND WARRANTS

The commission on rights and warrants shall be the same rate as applies to corresponding securities selling at equivalent prices. (See Special Commission Rates below).

BONDS AND DEBENTURES

(a) Government of Canada bonds maturing in more than one year: 1/4% of the selling price, with a minimum of 25 cents per \$100.00 of the principal amount;

(b) All other bonds and debentures: 1/2% of the selling price, with a minimum of 50 cents per \$100.00 of the principal amount;

(c) Government of Canada treasury bills and Government of Canada bonds maturing within one year: the charging of a commission shall be at the member's discretion.

If a transaction in bonds, debentures or treasury bills takes place off-the-floor (over-the-counter), it may be on a net basis, i.e. without commission.

SPECIAL COMMISSION RATES

On this Exchange the charging of any commission on purchase or sale of a stock which has been called for redemption shall be optional and the minimum price spread in such stocks shall be 5 cents if selling under \$10.00, and 12 1/2 cents if selling at \$10.00 or over.

When rights or warrants are selling under one cent, the charging of a commission and the amount thereof, if any, shall be at the member's discretion.

ONTARIO STOCK TRANSFER TAX

On Shares of Stock Selling at:		
Less than \$1.00	1/10 of 1% of value of sale	
		Per Share
\$ 1.00 to \$ 5.00		1/4 cent
5.01 to 25.00		1 cent
25.01 to 50.00		2 cents
50.01 to 75.00		3 cents
75.01 to 150.00		4 cents
Over \$150.00 - 4 cents plus 1/10 of 1% of value over \$150.00 per share.		

On Rights and Warrants - No transfer tax is payable.

On Bonds and Debentures:
For each \$100.00 par value or fraction 3 cents

ALL TRANSACTIONS FOR VALUE THREE DAYS AFTER PURCHASE OR SALE.

YIELDS AND EARNINGS-RATIOS CANADIAN SECURITIES AND BILLS

The chart below contrasts the trends of dividend yields of industrial stocks and interest yields of Bonds and Treasury Bills. The bond yield figures are published by the Bank of Canada and are the "average of all direct Government of Canada issues due or callable in 10 years or over, excluding perpetuals". The Treasury Bill yields are for 91-day Bank of Canada Treasury Bills. The values plotted for the bond and Treasury Bill yields are for the last Wednesday of each month. The Industrial Stock Yields are produced by the Toronto Stock Exchange and represent the yield of those stocks which are included in the Exchange's Industrial Index.

Also plotted are the earnings yields for the Industrial Index of the Toronto Stock Exchange. This is the converse of the Industrial Index P/E ratio.

DIVIDEND HIGHLIGHTS SEPTEMBER, 1968

Of the 637 issues of the 449 dividend paying companies, dividends were declared on 146 issues of 105 listed companies during September.

The indicated dividend rates of the 201 declarations were increased in eight cases and decreased in one.

The indicated dividend rate of the company, as used here is a projected annual rate based on past practices of the company paying dividends, and current information.

Following is the list of stocks showing their new indicated rates, the dates that those changes become effective, and the initial dividends and their payable dates.

INCREASED DIVIDEND (INDICATED) RATES

	Previous Rate	New Rate	Change Effective	
Cdn. Imperial Bank	x \$.55	x \$.63	November	1
First Nat. City Bank	v 2.00	v 2.20	October	31
Highland Bell	p .20	p .30	October	25

REAL ESTATE

NEW INDEX SUB-GROUP

On Tuesday, October 15, 1968 The Toronto Stock Exchange commenced publishing a new sub-group of the Industrial Index—the Real Estate Index. This sub-group is composed of the following seven stocks.

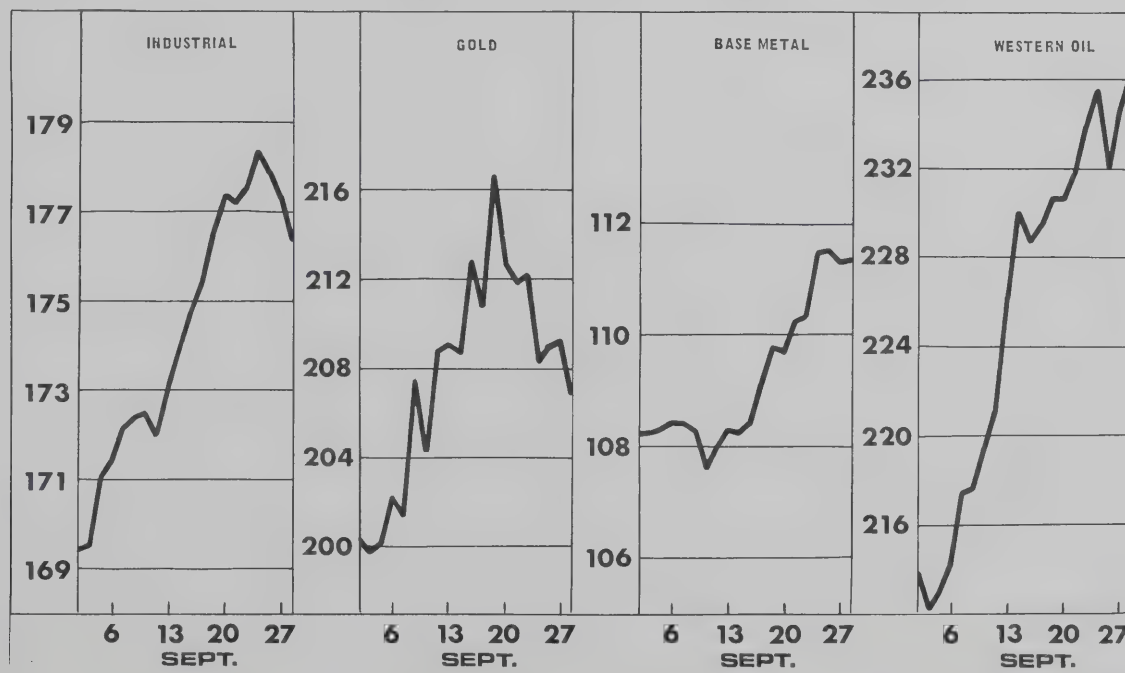

Block Bros. Industries Limited	Capital Building Industries Ltd.
Bramalea Cons. Development Ltd.	Markborough Prop. Limited
Canadian Interurban Properties Ltd. (44.62%)	Peel-Elder Limited
	Revenue Properties Limited

As of December 31, 1967, the new Index was equal to 100.00. Below is a summary of the month-end levels of the Real Estate Index from December 31, 1967 to September 30, 1968 inclusive.

DATE		INDEX	P/E RATIO	YIELD
DECEMBER	1967	100.00	17.35	1.14
JANUARY	1968	106.64	18.50	1.07
